DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species I in the reply filed on May 25, 2005 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague and indefinite because in claim 1 the subparagraph beginning "a differential pressure regulating valve..." is confusing because it sets forth that the valve is located in the first and the second refrigerant passages. However, the valve, (as shown at 14 in Fig. 1) is only located in the passage going from the discharge chamber to the crank chamber, i.e. the first refrigerant passage. Also, in lines 27-29 the fixed orifice is said to be located in both of the first and the second refrigerant lines, but as shown in Fig. 1 the fixed orifice (15) is only located in the second refrigerant line.

Allowable Subject Matter

Claims 1 and 3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ota et al, Tokumasu and Mameda et al disclose variable displacement swash plate refrigerant compressors having displacement controlled by multiple valve arrangements.
